

## CivilCAD 2016 Installation Guide

---

### Pre-existing requirements for CivilCAD 2016 installation:

- 1) **If your operating system is Windows XP – Make sure it is with Service Pack 3!**
- 2) **If your operating system is a 64bit – right click on the Setup EXE file and select the 'Run as Administrator' option.**
- ❖ **If this is a fresh installation of CivilCAD, start from stage 8**
- ❖ **If you upgrade from older version of CivilCAD to CivilCAD 2016, start from stage 3**
- 3) Go to: Start→Control Panel→Add or remove programs.
- 4) Un-install CivilCAD 20XX.
- 5) Go to: C:\Program Files\ and delete CivilCAD 20XX folder.
- 6) **In Windows Vista/7/8/10 OS** – go to: C:\ProgramData\SivanDesign\ and delete CivilCAD folder.  
  
**In Windows XP OS** – go to: C:\Documents and Settings\ApplicationData\SivanDesign\ and delete CivilCAD folder.
- 7) Go to: C:\WINDOWS\System32\ and make sure that the following files do not exist (if they exist – delete them):
  - AutoCADControl.ocx
  - Controller2008.dll
  - SDGrid.ocx
- 8) Install CivilCAD 2016 V1.0 from the installation CD.
- ❖ **You can use the CivilCAD 2016 Installation Process Guide which will guide you step by step through the installation process.**
- 9) Load CivilCAD 2016.
