

This guide is used to update a version to CivilCAD10.2 only

A user who is working on an older version needs to install CivilCAD10.2 and only then can a version be updated

1. Please download the software update file from the website:
Sivandesign → Downloads

The screenshot shows a website announcement for a software update. It features a blue globe icon on the left, followed by the text "CivilCAD 10.2 Software Update" in a blue font. Below this, it says "Posted: March 05, 2020". The main text describes the update, stating it allows users to enjoy the latest and improved version of CivilCAD 10, including new features, bug fixes, and better performance. It also mentions that the update is free for CivilCAD 10 users. At the bottom of the announcement, there is a yellow button with the word "Download" in black text.

2. To start the installation, double-click the installation file Update_CivilCAD_exe

3. When the 'Install Shield Wizard' window opens, click Next

4. License Agreement' window, select 'I accept the...' and click Next

5. In the 'Customer Information' window, fill in the User Name and Organization name and click Next
