CivilCAD 10 Installation Guide

Pre-existing requirements for CivilCAD 10 installation:

* If this is a fresh installation of CivilCAD, start from stage 6.
* If you upgrade from older version of CivilCAD to CivilCAD 2016, start from stage 1.

1) Go to: Start → Control Panel → Add or remove programs.

2) Un-install CivilCAD 20XX.

3) We recommend checking folder in: C:\Program Files\ and delete CivilCAD 20XX folder.

4) In windows 7/8/10 OS – go to: C:\ProgramData\SivanDesign\ and delete CivilCAD folder.

5) Install CivilCAD 10 from Setup_CivilCAD_10.exe.

* You can use the CivilCAD 10 Installation Process Guide, which will guide you systematically through the installation process.

6) Load CivilCAD 10.
