

CivilCAD 2000, Version 5.0

Coming soon- 30th of May, 2002.

Our new release of **CivilCAD 2000** is at door, with new, exciting features inside. Now, more than ever, **CivilCAD 2000** includes advanced yet easy to use, new modules & improvements. Our new features will make your work faster, more accurate and finally better.

In our new version:

General-

- New improved editor, enabling full editing capabilities in all of the software's tables.
- Windows XP (MS) full compatibility.
- New, improved look.

Roads-

- New extract feature that will make urban roads design much easier.
- Automatic SuperElevations mechanism.
- Berms definition table.
- Sheets division feature combining profile & horizontal alignment automatically.
- Interactive mutual effect between horizontal alignment-vertical alignment-cross sections.
- Cross sections new names format enabling writing in the format of 0+000, 0+025, 0+037, 0+100, 1+350 etc.
- Layers division in designed road's contours.

Pipes-

- New improvements in cables design.
- Automatic sections sheets divisions. Sections printout new look.
- Water-supply quantities report.

Surveying-

- A completely new distomats data tool- new 'Excel like' editor, multiple orientations, multiple back-sights.
- New codes sets included.

And much, much more...

Wait for our new version. It is one worth waiting for.
